

# Enterprise Mobility Management for BlackBerry

## About 1Mobility

1Mobility, a global company, offers a cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that secures, monitors, manages and supports mobile devices across platforms, service providers and manufacturers.

1Mobility provides an affordable solution either cloud based or privately installed, enables over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console.

1Mobility offers following solutions

- Enterprise Mobility Management (EMM)
- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- App Wrapping and containerization
- BYOD Management

## 1Mobility for BlackBerry

BlackBerry devices from the same central console that is used for managing other mobile devices and operating systems like Android and iOS. 1Mobility provides a cloud connector that interfaces with organization's existing BlackBerry Enterprise Server (BES). 1Mobility utilizes native BES APIs and toolkits to configure devices.

Administrators can extract General, Hardware and Network Information as well as can monitor the applications installed on the devices.
