Mobile Expense Management Solution

About 1Mobility

1Mobility, a global company, offers a cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that secures, monitors, manages and supports mobile devices across platforms, service providers and manufacturers.

1Mobility provides an affordable solution either cloud based or privately installed, enables over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console.

1Mobility offers following solutions

- Enterprise Mobility Management (EMM)
- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- App Wrapping and containerization
- BYOD Management

1Mobility Mobile Expense Management

1Mobility's Mobile Expense Management Solution (MExMS) is the system for automating management of mobile expenses (voice and data plans) across your enterprise to monitor, track and report mobile expenses.

1Mobility provides values of detailed expense management and a demonstrable path to BYOD strategy. 1Mobility tracks and reports back the transition and expense shift. After moving to BYOD, employees are able to file expense through a web or mobile interface.

MExMS helps enterprises to eliminate unnecessary mobile expenses by analyzing the corporate bills using our custom technology and advising our clients on an appropriate BYOD transition path.

Why you need it

Mobile expenses are sky rocketing with the use of Smart phones. There is no visibility into the data and voice usage for the mobile devices in any organization.

Bring your own device (BYOD) is the right strategy for enterprises, but they don't know where to start and how to include cost savings as part of overall decision making process.

Above all, EDI (Electronic Data Interchange) and TEMs (Telecom Expense Management Services) are very expensive and enterprises need a simple tool to get visibility and actionable BI data to deal with wireless expenses.

1Mobility has developed a sophisticated Mobile Expense Management solution, designed with advanced ETL tools for extracting data from complex carrier PDF mobile bills.

Our state-of-the art engine is capable of recognizing reoccurring patterns of data layout, formatting, and content thus identifying fields and records to be extracted automatically. The platform is scalable and can process telecom bills of thousands of wireless numbers (line).

Process

Enterprises can use the expense management tool in either of the following options

- Integrated BI platform
- Data extraction tool

As a part of 1Mobility (Enterprise Mobility Solution Suite)

- Cloud Based
- Privately installed

Simple steps

- Assign cost centers to the devices
- Upload monthly corporate bill
- Generate reports
- Guidance on BYOD transition path
- Track and report transition and expense shift
- Self-service web portal for employees for expense filing

Summary

1Mobility's Mobile Expense Management system includes advanced ETL tools for extracting data from complex carrier PDF mobile bills and process the information to bring you following benefits

- Simplicity
- Cost effectiveness
- Scalability
- Demonstrable path to BYOD strategy
- Integrated BI platform
- Web and Mobile interface for employees to upload their bills
- Optimize corporate plans with effectively tracking Data and Voice usage
