About 1Mobility

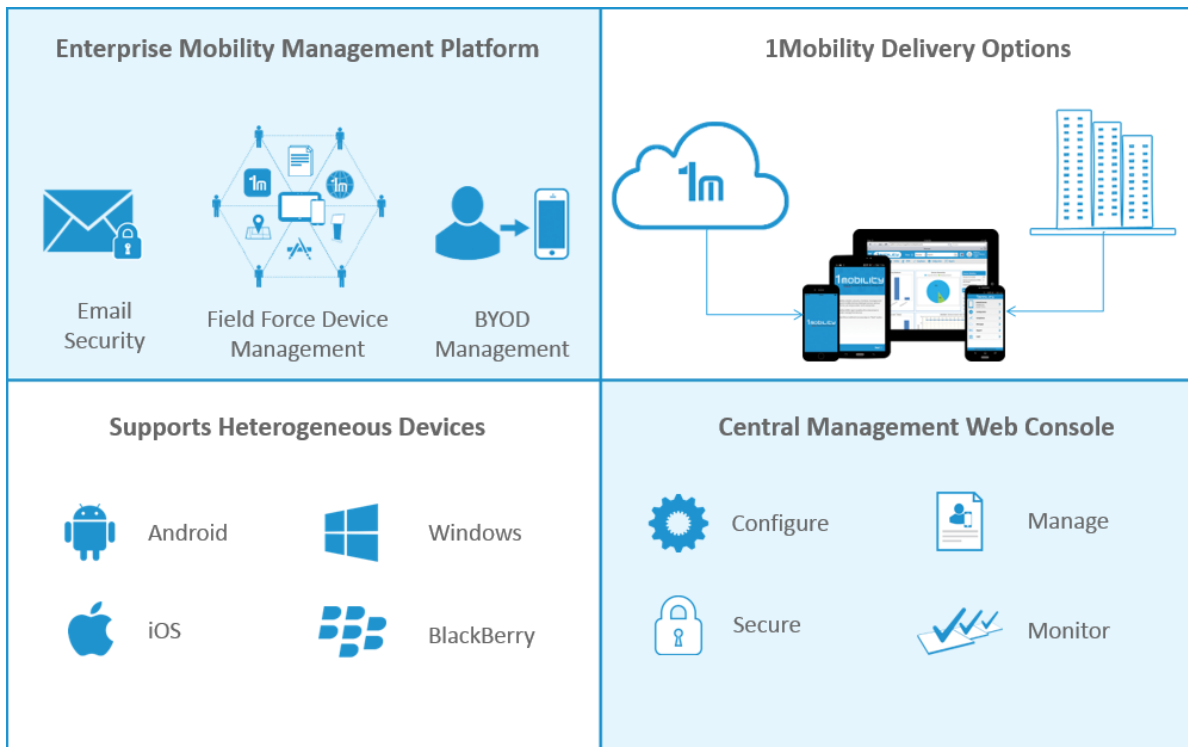

1Mobility has successfully established itself as a global company, offering cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that monitors, manages and supports mobile devices across platforms (Android, iOS, BlackBerry, Windows), service providers and manufacturers.

1Mobility has a team of dedicated and talented professionals with over 8 years of innovative software development believes that “today, Enterprise Mobility though not mandatory, is a fact of business life for various obvious reasons like increased productivity, cost savings, competitive advantage and better customer engagement.”

Having serviced industries like Banking, Financial Services, Insurance, Technology, Education, Pharmaceutical, Communication & Media and Government and initial focus on the emerging markets, 1Mobility provides affordable solutions either cloud based or privately installed, enabling over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console. No matter what type of organization it is, 1Mobility has affordable solutions and services for all, be it initial, advanced or matured enterprise mobility.

1Mobility offers following solutions

- Enterprise Mobility Management (EMM) through consulting, development and managed services
- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- Containerization
- BYOD Management

Challenge

One of the most common and cost-effective usages of smart devices, specifically tablets, has been using them for customer communication through rich and easy set of interactive Apps and interfaces. Many industries have adopted tablets as their primary communication and productivity tool for the field force. Tablets have been built for personal usage, but of course manufacturers like Samsung and Apple have been making these as enterprise friendly devices, these devices are vulnerable as the end user is the administrator on these devices and can change any settings or install applications.

1M Kiosk Product

1Mobility Kiosk product allows you to implement advanced security by locking the device to one or more specific Apps as well as disallowing settings and installation of other Apps on the device.

Through Kiosk mode, you achieve following

- ▶ Whitelisting approach, easy to manage!
- ▶ Complete lock down to secure the device and data
- ▶ Selective access to various settings and device features

Highlights

A centralized web console for configurations and management

- ▶ User friendly policy creation and over-the-air (OTA) distribution
- ▶ Binding of Kiosk App to the Home button of the device
- ▶ Branding through custom wallpaper for the kiosk devices
- ▶ Custom color for App icon
- ▶ Single or Multi App mode
- ▶ Include enterprise and public Apps from your Enterprise App Store
- ▶ Home screen Wallpaper can be set in both Portrait and Landscape view
- ▶ App icon size can be set according to its device screen size.
- ▶ Restriction settings
 - Display/Hide 1Mobility Agent Launcher Icon on Home Screen
 - Display 1Mobility Enterprise Email Client Icon on Home Screen
 - Allow calling from the device Mobile Kiosk Management (MKM) 2
 - Allow to view or manage Contacts
 - Enable or disable access to manage
 - Modify Application Name in “Multi App Mode”
 - Restrict status bar expansion in vanilla devices.
 - Show/Hide Launcher application
 - Display Setting
 - Security Settings
 - Application Setting
 - Sound Setting
 - Language Setting
 - Bluetooth Setting
 - Wi-Fi Setting
- ▶ Secure access to corporate intranet sites using 1M Browser App, which also can be in the Kiosk Mode by allowing to access only bookmarked websites
- ▶ Kiosk Mode can be removed in case you need to repurpose the device for another usage.

Policies and Configurations Management

Along with the Kiosk mode, you are allowed to configure all the data loss prevention and configurations as you usually do through a central web console.

You may set up Kiosk policies based on the group or location of the user and allow only the Apps that are required for their role.

Remote querying of device information and commands like de-enroll, wipe corporate data, lock device etc., as well as compliance monitoring and automated actions on compromised devices is possible in kiosk mode.

Summary

1Mobility's Mobile Kiosk Management (MKM) solution has helped various productive and secure usages of mobile devices by field force, at retail locations as well for customer engagement. Various industries like but not limited to Education, Healthcare, Government, Manufacturing, Pharmaceutical, Banking and Insurance are benefiting from the Kiosk solution.
