About 1Mobility

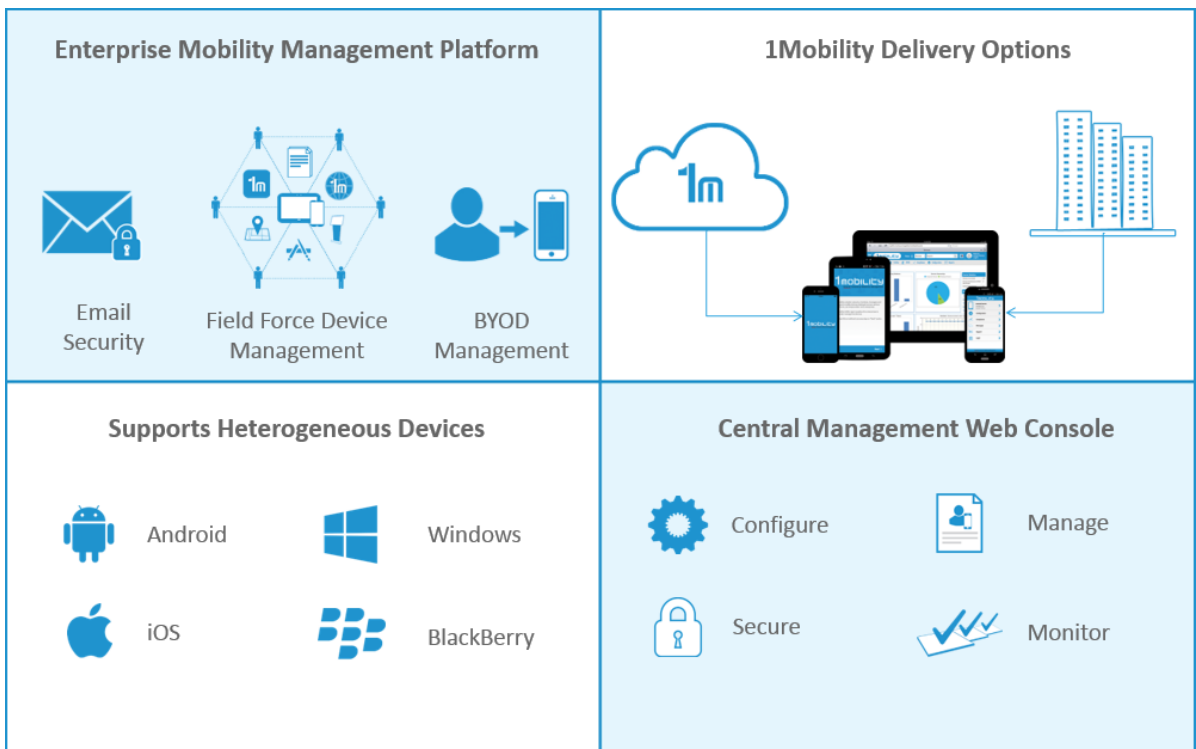

1Mobility has successfully established itself as a global company, offering cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that monitors, manages and supports mobile devices across platforms (Android, iOS, BlackBerry, Windows), service providers and manufacturers.

1Mobility has a team of dedicated and talented professionals with over 8 years of innovative software development believes that “today, Enterprise Mobility though not mandatory, is a fact of business life for various obvious reasons like increased productivity, cost savings, competitive advantage and better customer engagement.”

Having serviced industries like Banking, Financial Services, Insurance, Technology, Education, Pharmaceutical, Communication & Media and Government and initial focus on the emerging markets, 1Mobility provides affordable solutions either cloud based or privately installed, enabling over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console. No matter what type of organization it is, 1Mobility has affordable solutions and services for all, be it initial, advanced or matured enterprise mobility.

1Mobility offers following solutions

- Enterprise Mobility Management (EMM) through consulting, development and managed services
- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- Containerization
- BYOD Management

Mobile Browsing Management (MBM)

1M Browser

Mobile web browser is one of the basic collaboration, productivity and data access tool that probably every organization needs. Mobile Apps are important but easy and quick way of mobilizing corporate data is through web and it is equally important to secure the data accessed through web. The other aspect of web browsing is the vulnerability to your network and to the data on the device through needless websites and even malware. 1M Secure Browser is a full browser with a very familiar and user-friendly interface that brings enterprise grade security to match with your compliances and security policies. 1Mobility Secure Browsing enables secure browsing and empowers organizations with configuration of customized settings to meet their unique business and end-user needs as well as protect valuables on the devices.

Highlights

- ▶ A centralized web console for configurations and management
- ▶ User friendly policy creation and over-the-air (OTA) distribution
- ▶ Secure access to corporate intranet sites and networks without device VPN
- ▶ Real-time management of all browser traffic based on policies defined
- ▶ Blocking malware and malicious websites as well as restrict URLs
- ▶ Kiosk Mode enables limited browser navigation
- ▶ Disabling of cookies, file downloads, and copy and paste
- ▶ Seamless integration with 1Mobility Workspace
- ▶ Simple and user-friendly interface with the known experience through tabbed browsing, bookmarks, search and history

Policies

1Mobility allows various security policy configurations that enable you to enforce secure browsing without altering user-experience.

- ▶ Disable or Blacklist other browsers and allow only 1M Secure Browser
- ▶ Whitelist or Blacklist URLs
- ▶ Define Proxy for the web traffic

- ▶ Passcode policy
- ▶ Single Sign-on (SSO)
- ▶ App Tunnel - secure tunnel for data travel
- ▶ Data Loss Prevention (DLP) by configuring policies for
 - Copy and Paste
 - Printing
 - Composing Email
 - Bluetooth
 - Location Services
 - Screen Capture
 - Wi-Fi Connection (App Access only via Wi-Fi or Whitelisted Wi-Fi)
 - Cellular Data (App Access only via Mobile Data)
- ▶ Kiosk – Allow only one whitelisted URL

Use Cases

1Mobility allows Administrators defining security settings for ownership types like corporate or employee owned as well as group and location of the users and these settings are delivered to the devices real-time over the air.

Corporate Devices

- ▶ Disable or Blacklist other browsers and allow only 1M Secure Browser
- ▶ Enable predefined set of intranet sites and external URLs by configuring bookmarks
- ▶ Enable secure transfer of data of intranet sites through App tunnel

BYOD

- ▶ Enable intranet websites on employee owned devices
- ▶ Enable secure transfer of data of intranet sites through App tunnel
- ▶ Enforce security by turning on single sign on (SSO)
- ▶ Configure data loss prevention (DLP) policy

Distribution of 1M Browser

You can distribute the 1M Browser and associated policies over-the-air using the central web console through Mobile Apps Management (MAM) product.

Summary

1Mobility's Mobile Browsing Management (MBM) solution has strengthened management of mobile browsing in various industries like but not limited to Education, Healthcare, Government, Manufacturing, Pharmaceutical, Banking and Insurance.
