

# iOS Datasheet

## About 1Mobility

1Mobility, a global company, offers a cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that secures, monitors, manages and supports mobile devices across platforms, service providers and manufacturers.

1Mobility provides an affordable solution either cloud based or privately installed, enables over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console.

1Mobility offers following solutions

- Enterprise Mobility Management (EMM)
- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- App Wrapping and containerization
- BYOD Management

## 1Mobility for iOS

### Differentiators

### Simple. Fast. Affordable.

Designed for usability, eliminates the overwhelming complexities of competing solutions. You may start managing your devices in few hours once you enroll on cloud-based solution and our subscription-based pricing is based on the number of company mobile users, you pay as you go.

### Features

#### Mobile Device Management

- Central web console for managing devices
- Over-The-Air (OTA) device enrollment and installation of security profiles
- Configure Email
- Configure Wi-Fi

### Everyone talks about BYOD, we help you get there!

Bring Your Own Device (BYOD) is a global trend for the obvious reasons; cost-effectiveness and increased productivity. All competing solutions can manage the BYOD devices, we can manage them too but we help you with BYOD transition path.

### Integrated “true” expense management

We have generated cost savings by analyzing the corporate bills using our custom technology and advising on an appropriate BYOD transition path. 1Mobility tracks and reports back the transition and expense shift. Employees are able to file their expense through a web or mobile interface.

- Configure VPN
- Kiosk Mode
- Distribute Apps
- Detect compromised devices
- Lock Device, Clear Passcode, Send Message, Wipe Device
