

Mobile Fence Based on Geo-Location, Time, Wi-Fi

About 1Mobility

1Mobility has successfully established itself as a global company, offering cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that monitors, manages and supports mobile devices across platforms (Android, iOS, BlackBerry, Windows), service providers and manufacturers.

1Mobility has a team of dedicated and talented professionals with over 8 years of innovative software development believes that “today, Enterprise Mobility though not mandatory, is a fact of business life for various obvious reasons like increased productivity, cost savings, competitive advantage and better customer engagement.”

Having serviced industries like Banking, Financial Services, Insurance, Technology, Education, Pharmaceutical, Communication & Media and Government and initial focus on the emerging markets, 1Mobility provides affordable solutions either cloud based or privately installed, enabling over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console. No matter what type of organization it is, 1Mobility has affordable solutions and services for all, be it initial, advanced or matured enterprise mobility.

1Mobility offers following solutions

- Enterprise Mobility Management (EMM) through consulting, development and managed services
- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- Containerization
- BYOD Management

For further information, please visit the 1Mobility website at <http://www.1Mobility.com>

Geo-Fence

Many organizations use combination of corporate owned and employee owned (BYOD) devices for various business purposes. Some of the risks with these devices include

- ▶ Intentional or unintentional data loss,
- ▶ Unproductive use of the devices
- ▶ Vulnerability to the internal company network.

The best balance would be to lock down devices or apply compliances only when the employees are working or accessing corporate network.

1Mobility provides a comprehensive solution that extends Location, Wi-Fi and Time based fencing solution. This allows organizations to define and conditionally apply restrictions on Devices, such as but not limited to

- ▶ Features and Network configurations,
- ▶ Apply Data Loss Prevention (DLP) policies,
- ▶ Restricts Device Apps
- ▶ Run compliance checks when the Devices connect to corporate Wi-Fi or are within a particular Time Schedule.

These policies are automatically removed when the devices are disconnected from the corporate Wi-Fi or exit the “Time Schedule”.

Highlights

1Mobility supports

- ▶ Wi-Fi based fencing
- ▶ Time based fencing
- ▶ Proximity (Distance) Based fencing:
- ▶ Multiple fences
- ▶ Fence specific DLP policies
- ▶ Analytical reports
- ▶ Fence specific compliance rules

Configuration of fences

1Mobility provides a centralized console to manage Wi-Fi, Time and Proximity (Distance based) based fences. From the console, the Administrator is able to add and view Wi-Fi, Time and Distance based fences.

Once the administrator has defined the multiple fences, they can associate these fences with Device Policies and Configurations. The policies get applied conditionally when user enters or leaves the fence.

There is elaborate logging of when the user entered or exited the fence/s and detailed reports can be generated through advanced queries under Reports modules.

Summary

The fences give a tool to manage a perfect balance between the privacy and data protection, especially in Bring Your Own Device (BYOD) scenario.
