About 1Mobility

1Mobility has successfully established itself as a global company, offering cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that monitors, manages and supports mobile devices across platforms (Android, iOS, BlackBerry, Windows), service providers and manufacturers.

1Mobility has a team of dedicated and talented professionals with over 8 years of innovative software development believes that “today, Enterprise Mobility though not mandatory, is a fact of business life for various obvious reasons like increased productivity, cost savings, competitive advantage and better customer engagement.”

Having serviced industries like Banking, Financial Services, Insurance, Technology, Education, Pharmaceutical, Communication & Media and Government and initial focus on the emerging markets, 1Mobility provides affordable solutions either cloud based or privately installed, enabling over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console. No matter what type of organization it is, 1Mobility has affordable solutions and services for all, be it initial, advanced or matured enterprise mobility.

1Mobility offers following solutions

- Enterprise Mobility Management (EMM) through consulting, development and managed services
- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- Containerization
- BYOD Management

Mobile Application Management

Mobile devices (smartphones and tablets) are revolutionizing businesses by increasing productivity, efficiencies and improving customer satisfaction. 1Mobility Enterprise Mobility Management solution provides security and scalability to solve challenges for managing mobile devices, apps and email within the enterprise. IT Administrators must have the control and visibility to manage the full app lifecycle, and end users must have seamless access and connectivity to the corporate resources they need.

“By 2017, 25 percent of enterprises will have an enterprise app store for managing corporate-sanctioned apps on PCs and mobile devices”

Gartner

Key Benefits

- Secure deployment of apps (enterprise or public)
- Define and enforce compliance policies via blacklisting or restricting apps in Wi-Fi or time based Geofence (BYOD)
- Controlled over-the-air (OTA) distribution of apps to group of users or a single device with a click of a button
- Apply DLP policies like authentication, detection of jailbroken/rooted devices, copy-paste etc. for existing/legacy apps via app wrapping i.e. without changing a single line of code
- Selectively wipe corporate apps on demand or via automated compliance rules

Enterprise App Catalog

Easy to use and secure enterprise app catalog for individuals

Manage

Manage your enterprise apps or play store/app store apps and their updates

1M Secure Apps

Integrate DLP policies for existing app without changing a single line of code via app wrapping

1M Workspace

Group your enterprise apps in a 1Mobility Workspace app and apply DLP policies collectively

Ecosystem

1Mobility provides an ecosystem of apps required to implement DLP policies and integration with existing infrastructure

- Secure Browser – Provides Mobile Browsing Management for devices and integrates with Mobile Access Gateway to securely extend intranet resources on mobile devices
- Secure Viewer – Secure attachments for emails
- 1M Workspace – Group enterprise apps and collectively apply DLP policies
- 1M Enterprise Email for Android – Fine grain control over DLP policies for emails for POP/IMAP and Exchange

Volume Purchase Program

Support for bulk app licenses

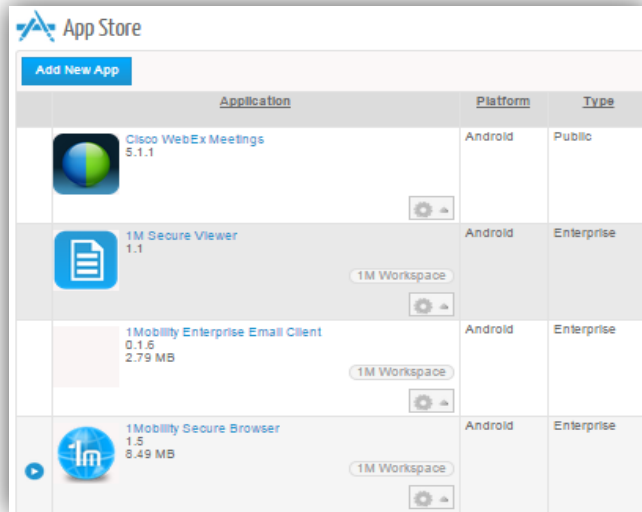

App Compliance

Blacklist, Whitelist, Restrict or Recommend apps

Mobile Application Management

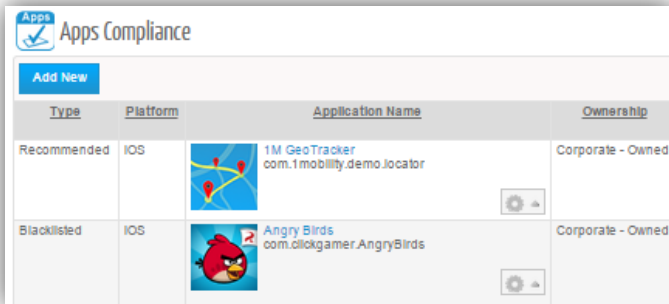

Application Distribution

- ▶ Distribute managed (enterprise) apps and updates OTA without user interaction.
- ▶ Integrate directly with public app stores, like Apple, Google Play to provide public apps.
- ▶ Integrate with Apple’s Volume Purchase Program to purchase business apps.
- ▶ Secure distribution of apps based on groups with unique requirements and access.
- ▶ Provide an enterprise app catalog where users can view, install and update apps.

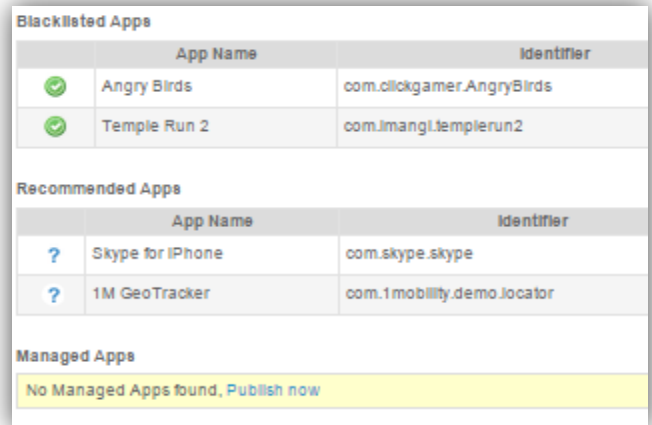

Application Security

- ▶ Authenticate users before allowing them to view and download enterprise apps
- ▶ Secure access to the enterprise app catalog based on user group and location
- ▶ Restrict native apps on a device and whitelist/blacklist publicly available apps
- ▶ Monitor and enforce device compliance with corporate application policies

Application Tracking

- ▶ Track and view installed/approved/rogue applications at the device/user level
- ▶ Receive instant alerts when an end user has installed a blacklisted app
- ▶ Generate application inventory, version history, and compliance reports
- ▶ Restrict apps based on the Geofence to increase productivity of end users

Application Management

- ▶ Configure corporate policies for public apps using whitelists and blacklists
- ▶ Install, update and remove managed apps from a device remotely
- ▶ Disable access to corporate apps if an end user leaves or loses their device

Integration with Apple's Volume Purchase Program

- ▶ Monitor licenses purchased, redeemed and remaining for each order
- ▶ Upload, store and distribute redemption codes to authorized users
- ▶ Confirm the redemption of codes and successful installation of apps

Enterprise App Container

- ▶ Enforce passcode policy for enterprise app access.
- ▶ Integrate authentication with LDAP.
- ▶ Isolate corporate data.
- ▶ Data loss prevention (DLP) for Data at rest (DAR) and data in motion.
- ▶ Easy, consistent and comprehensive solution to secure the data at rest and in motion.
- ▶ Single sign-on

App Compliance Enforcement

- ▶ Blacklist, Whitelist and Recommend apps
- ▶ Block native apps like You Tube etc.
- ▶ Configure automated compliance enforcement
- ▶ Remove apps instantly via Admin Portal and track installations
