- Data Loss Prevention (DLP) of Mobile Data
- Compliance enforcement and monitoring
- Containerization
- BYOD Management

Often, decision makers are on the move to accelerate business, which hampers day to day workflow activities for need of approvals and sign offs from stakeholders.

Challenge

A fortune 500 multinational conglomerate faces a problem wherein a large number of executives and decision makers are often on the move. There are some basic workflows such as purchase/expense approvals, leave approval etc. get delayed because they are intranet applications and not available outside the office network.

"The VPN infrastructure is expensive and mostly, cannot be used on the mobile devices." Says the CIO. VPN may disconnect with fluctuations in connectivity as well as timeouts. "Though our vision on mobility is extensive, we would like to start with enabling at least the small workflows through web interface on the mobile devices, of course without the need for individuals to connect through VPN" said GM, IT.

Solution

1Mobility provided a "**Secure Browser**" with a very familiar and user-friendly interface to bring enterprise grade security to match company's compliances and security policies.

1Mobility Secure Browsing enables secure browsing and empowers the organization with pre-configured settings to meet unique business needs as well as to protect corporate assets on mobile devices.

About 1Mobility

1Mobility, a global company, offers a cloud based, internationalized and scalable Enterprise Mobility Management (EMM) solution that secures, monitors, manages and supports mobile devices across platforms, service providers and manufacturers.

1Mobility provides an affordable solution, enables over-the-air distribution of mobile applications, configuration settings and security policies to corporate owned or employee owned (BYOD) devices through a central web console.

The solution provides following features
- Blacklist URLs
- Kiosk – Allow only one whitelisted URL
- Define Proxy for the web traffic
- Passcode policy
- Single Sign-on (SSO)
- Data Loss Prevention (DLP) by configuring policies.

1Mobility also provided "**Mobile Access Gateway**" integrated with secure browsing which is a secure tunnel for intranet web resources without requiring any changes to the existing infrastructure.
- Enabling intranet web resources on mobile devices without requiring VPN.
- Provides a secure tunnel for data in-transit.
- Authenticates devices, users and requests before redirecting them to intranet server.

Results

1. Seamlessly mobilized the business workflows

1Mobility platform enables secure workflows in a flexible, yet controlled, manner. Secure mobile workflows significantly reduced risk to corporate data.

2. Protection for corporate data and network

1Mobility enabled complete visibility into devices which connect to Corporate network. Only the compliant & approved devices are allowed to connect to network, which substantially reduced vulnerability and security breaches. 1Mobility Solution helped keeping jailbroken/rooted devices accessing corporate data and automating process of proactively identifying and remediating the vulnerabilities.
